## BOTANICAL ART CLASS

With Elaine Musgrave

Monday – fortnightly

Learn how to create a finely detailed botanical painting.

Classes are held on a Monday once a month from 9am – 4pm. Learn the importance of light, shade and form and the importance of a good composition.

Students will learn the use of watercolour washes and dry brush techniques to create the illusion of a three dimensional work on paper. We will also explore the use of graphite and watercolour within a study.

Students may bring their own plant specimen or a work in progress. Subject matter may also be supplied.
